Technology

**Doug Breitnauer**

Director of IT Infrastructure and Operations

Doug is the Director of IT Infrastructure and operations for SVA, A Professional Services Company.

Doug manages all IT functional areas across the firm including infrastructure design and deployment, network security, cloud strategy, server administration, help desk support, and web application development. He is also responsible for managing vendor service agreements and software licensing. Doug possesses a strong balance of technical and leadership skills, and works with his team to accomplish company IT goals.

Doug works with SVA's leadership and executive management to define how technology can align with business strategy to develop SVA's technology roadmap. Supporting the overall client service experience is critical in driving SVA's overall success. A major area of focus for SVA's internal IT is setting technological direction that aligns with core business objectives. Doug recognizes the need to continually innovate technology, along with business processes, to gain efficiencies.
